THE SUCCESS OF UNCONDITIONAL REPEAL GENER-ALLY CONCEDED-WHAT A WEEK MAY

BRING FORTH IN CONGRESS. Washington, Aug. 27.-When the House of Repreentatives meets at noon to-morrow it will begin votng on the several propositions included within the order adopted fifteen days ago for the consideration and disposal of the silver purchase question. The vote will be taken first upon the proposition to provide free coinage of silver at a ratio of 16 to 1 This failing, other ratios up to 20 to 1 will be voted upon; then the House will have an opportunity say whether or not it will restore the Bland-Allison act of 1878.

All these are connected with the repeal of the silver purchasing clause of the Sherman law of 1890; hat is doomed in any event. Finally all these having failed (assuming that they will fall to moure a majority of the votes cast) the House will face naked issue of unconditional repeal. It generally conceded that all of the propositions relating to the coinage of silver will be defeated. and that unconditional repeal will be carried. Only detail of majorities is in doub!

On Tuesday the report of the Committee or recommending the code for the government of the Lilld Congress, will be taken up and, it is believed, adopted without much delay. There is no intention manifest at this time to antagonize the committee's recommendations, and after explanaion of the effect of the proposed changes by Mr. Catchings, and probably some further observation by Messrs. Reed and Burrows, the minority of the

committee, a vote is expected.

After the rules have been adopted the programme in the House is uncertain. A recess for three days may be taken, which will give members and employes an opportunity to recover from the unusual strain of the last two weeks. Or the House may determine to continue in session that members may present the bills already prepared and waiting to introduced. But whether at once or later in the week, a bill-day will be provided. A small avalanche is expected of measures which failed to secure favorable action in previous Congresses stablishing at once calendars of considerable magnitude, and giving the new committees plenty of material for examination and report.

Some important results are probable from cor mittee action during the week. The Ways and Means Committee will meet on Tuesday, at which ne a course of procedure will probably be decided upon, including such matters as the approxidate when a tariff bill shall be reported, whether the committee will give hearings to inter ested persons or not, and other details relating to work with which it is charged. On the same day the Committee on Banking and Currency will with the expectation of finishing a report upon the bill providing for the exchange of National bonds for currency at the demand of the holder. The committee, it is believed, will favorably report the bill, with an amendment intended to protect the gold of the Treasury from raids by those who receive currency for their bonds. The committee will also take up the question of repealing the 1 per cent tax on the circulation of State banks. On this point Chairman Springer is quoted as

do not believe the committee will report a bill in favor of the repeal of the tax on State I do not believe in going back to the days of the old State banking system and of being com-pelled to have forty-four different kinds of curin this country. The removal of the tax upon State banks and the re-establishment of the old system would be an obstruction to business. I, for one, am against it, and I do not believe that a bill can pass. I favor a stable currency, good alike in all the States, accepted without ques tion everywhere, and familiar to the people, and printed upon such paper that counterfeits can be readily detected. Any other currency is an obstruction to business, and I shall oppose it."

In the Senate the week will probably begin amely with the Mantle case in the foreground. It has been agreed that a vote shall be taken at to-morrow upon the pending motion of Vance, to lay on the table Mr. Manderon's motion to reconsider the vote by which the Senate declared that Mr. Mantle was not entitled o a seat in the body. There is some expectation that Senator Morgan, who was absent when the last vote was taken, will be in his seat, and there is an intimation that there has been a change in the views of some of the Senators who voted against Mr. Mantle's claim, but few of his friends are confident that the decision of the Senate will

be reversed.

Senator Gordon is set down for a speech on the Senator Gordon is set down for a speech on the Selver bill on Tuesday. Senator Wolcott has also shiver bill on Tuesday. Senator Wolcott has also announced his intention of addressing the Senate announced his intention of addressing the Senate shiper of shiver. The National Senator on Wednesday on the subject of silver. The National Bank Extension bill is likely to be taken up at the first opportunity and pushed as rapidly as possible.

The Wilson bill is controlled to the controlled to t

as possible.

The Wilson bill is expected to reach the Senate not later than Tuesday. It will be promptly referred to the Finance Committee, and from that time on the committee will hold daily meetings until it is prepared to make a report to the Senate. It is within the bounds of possibility that some Senator may create a turmoil at some stage by endeavoring to call up the Peffer resolution directed at the New-York banks, but this can be done only by a majority vote.

NEW SYMPTOMS OF DEMOCRATIC DISCORD. SEVERAL REPEAL LEADERS TALK OF ADJOURN MENT AS SOON AS THE WILSON PILL IS PASSED.

Washington, Aug. 27 (Special).—There are new symptoms of discord among Democrats in the House. Several of the repeal leaders appear to as the Wilson bill is passed, to drop all other business until the Senate shall have disposed of that measure. Such a course, they argue, would concentrate public attention on that hody and compel speedy action. It is asserted that the Administration desires the House to adopt this policy for the reason given. It is further asserted that the Administration desires that the special session shall be brought to an end as soon as the Wilson bill becomes a law, in order that the country may have a chance to recuperate somewhat before the grand assault begins that is to be made upon its produc

Chairman Wilson, of the Ways and Means Com-mittee, and one of his colleagues, Mr. Bynum, of Indiana, are strongly in favor of this course, the latter expressing the opinion that his committee can frame a general tariff bill more quickly with Congress in recess than it can with Congress in session. Inquiries among prominent members on of the silver question, however, show the of Messrs. Wilson and Bynum, so far from meeting with general approval, will be generally opposed. It is argued that it would be not only unbecoming, but impolitic and unwise, for the House to organize itself into a sort of committee to to organize itself into a sort of committee to the Senate. Leading members of the House coerce the Senate. Leading members of the House coerce the Senate. Leading members of the House that the money on hand for that purpose. Assistant Secretary Quincy was called in and the three discussed the matter at length. It is understood that Mr. Geary received little satisfaction, as Secretary Quincy was called in his views to the policy of the which contemplates th sides of the House as well as on both sides House will have done its duty when it has dis-posed of the question of repeal, and that it will be exceeding the proprieties for them to attempt to dictate to or in any way interfere with the action of the Senate. Such a course by the House would be resented by the Senate and probably cause ir-ritation there which would injure rather than ad-vance the cause of repeal. It is very strongly argued that this Congress was not elected mere-ly to consider the silver question, and the repeal ly to consider the silver question, and the repeal of the Sherman law is but one of many things

they are called upon to consider Nearly every member of the House has bills prepared which he is anxious to see in print and have referred to the proper committees, and several of the more important committees desire to go promptly to work. It is true that some of the Democrats who took an active part in the cam-paign which elected this Congress and Mr. Cleveand reduction of the tariff, the repeal of the State bank tax, and other matters are now afraid to face the question, but the more experienced men face the question, but the more experienced men in the party are thoroughly convinced that there is nothing to be gained by temporizing, and they believe that delay of action will indicate a cowthat they were not confident of the propriety of

Meanwhile it is pected that various measures of general and special legislation will be reported from some of the

mittees. Early in September estimates for appropriation are expected by the House Appropriations Committee, and when they have been received work on the appropriation bills will begin at once. Meanwhile the committee has two or three minor to consider at once. The Committee on Ways and Means have not decided whether they will have hearings on the turiff, but the probabilities are that they will. This will consume some time, but it is believed that if they work diligently they will be able to report a bill late in November.

PENSIONS AND PARTISANSHIP.

ONLY DEMOCRATS TO BE APPOINTED ON EX-AMINING BOARDS HEREAFTER.

Washington, Aug. 27 (Special).-Ever since the establishment of medical boards to examine applicants for pensions down to the beginning of this Adminboards have been non-partisan. Under Republican Administrations two of the three members of each board were Republicans and one was a Democrat, and under the first Administration of Grover Cleveland these proportions were reversed. But Hoke Smith has changed all that He is of the opinion, and his opinion, of course, is also that of the Democrat Commissioner of Pensions, that "there has been too much partisanship" in these boards, which are composed solely of members of the medical profession in good standing, and it has therefore been prescribed and ordained in order to prevent partisan medical examinations that all the members of every medical examining board shall also be members of Democratic party, except in cases where it may be found impossible to muster three Democratic doctors. In such cases the appointment of one Republican member of the board will be tol-

It is also reported that Democrats who were members of such boards heretofore will not be ligible for appointment under the new dispensation. By a strict observance of the new regulations, it will be perceived the boards will be purged of all members who might be hampered by preexperience or knowledge of the pension laws and regulations in carrying out the hostile, severe and arbitrary instructions and rulings of the new Administration. Thus far, it is said, only about three in every 100 appointments of members of the new boards have been bestowed upon Republicans. It is thought that "friction will be avoided" by the new plan. The new order of things seems no to have been generally understood by Senators and Representatives, whose recommendations are usually followed in making these appointments. Most of them have been in the habit of recom-mending one Republican for each board, as was the practice under Mr. Cleveland's former Adthree Democrats. It is understood that some of the Northern Democratic Representatives are not enamored of the new policy, which they assert, will be harmful to the Democratic party in many North-ern districts. ministration. They are now called upon to select

THE ATLANTA'S BAD CONDITION. SECRETARY HERBERT IS AROUSED, AND OFFI-CIALS MAY SUFFER FOR THE NEGLECT OF THE VESSEL.

Washington, Aug. 27 (Special).-Secretary Herbert is in no pleasant frame of mind over the report made by the Board of Naval Officers which recently inspected the Atlanta. That a vessel of the Navy. in charge of officers whom the Department had reason to believe to be responsible, should be allowed to get into a state that would disgrace any merchant steamer affoat is bad enough. But that a board of officers, after ascertaining the disgraceful condition of the vessel, and declaring that such condition is due to gross neglect of duty and violation of explicit orders and regulations of the service, should practically recommend that no further steps be taken to fasten the responsibility and pu ish the offenders, is, to say the least, startling, But Secretary Herbert is not likely

let the matter rest where the board evidently wished it should. On the contrary, he is determined, it is said, to probe the matter to the bottom, and fix the responsibility for the damage the Navy has sustained. It is said that probably no other ship of the Navy has been so badly managed, nor has there been any vessel on which the discipline with reference to preserving the vessel from harm has been so lax. Reports at the Department prove conclusively that, while

vesel has ben rendered unfit for service. A larg-amount of money will be necesary to make her ready for commission again. In the Navy every vessel has what is known

as an inspection board, which must make quar-terly inspections of the vessel. A weekly inspection is also required to be made by the executive officer and chief engineer, to note any change of the condition of the ship. The last report received at the department regarding the Atlanta's con-dition by the ship's board was dated July I last. These are the officers who are supposed to have examined the ship: Lieutenant J. C. Wilson and H. S. Waring, and Passed Assistant Engineer W. M. Parks. Acording to their report the Atlanta is M. Parks. Acording to their report the Atlanta is a model vessel. No mention is made of the rust on her compartment doors, which prevented them closing, nor of the leaky drain pipes which rusted the hull so as to reduce it one-half its original thickness. In fact, they found everything about the vessel in a most satisfactory condition to them except in one compartment, which they reported was in good condition, with the exception of a slight leak, which had been repayed. Captain Bartlett, commanding the vessel, approved the report.

From the report it is evident that no inspection of the compartments was made except of the one which was reported to require slight attention. It is believed now that a third board will be appointed to look into matters which other boards have not touched upon. After this is determined some courts-martial may follow.

Administration in the matter, which contemplates Administration in the matter, which contemptates non-action in regard to carrying out the require-ments of the law until Congress shall have another opportunity of expressing itself on the subject, or of making sufficient appropriations to put the law thoroughly into effect.

The great camp meeting is absorbing the attention with meetings at a services of one kind or another in session all the time. There are twelve regular meetings on the programme for each day. THOUSANDS OF PEOPLE AT THE OCEAN GROVE " LOVE FEAST"-MANY OVERFLOW

Ocean Grove, N. J., Aug. 27 (Special).—To day has marked the climax of the serion here. It has been "Camp-meeting Sunday." From early morning till late to-night there have been crowded meetings, way for the annual camp meeting "Love Feast," which began in the Auditorium at 9 o'clock, and con-

the fund of \$50,000 for the new auditorium. Much of this was subscribed during the day. The Rev. Dr. C. N. "Verily I say unto you, among them that are born of woman there hath not risen a greater than John of the world with the start has the start in the the Emptist, notwithstanding, he that is least in the Kingdom of Heaven is greater than he." He contrasted John as the most perfect development of the new, John's mission was denunciatory, and his system as one of compulsion, Christ's is all love. When Satan tempted Christ in the wilderness he tried hard to get Him to adopt other methods of work. In asking Him to turn stones into bread he seggested for Christ's adoption the Henry George theory—the null poverty arrangement for humanity. THE STATE PUNACY COMMISSION TO ENFORCE THE LAW REGARDING PEIMBURSEMENT BY PERSONS ABLE TO PAY.

The transfer agents appointed by the cor-P. Ford, jr., of Syracuse, and Lyman Robinson, of Mattenwan-have nearly completed a canvass of the fifty-eight counties of the State affected by the State Care act. Their investigations have amply confirmed the assertion of the commission, based on its previous knowledge, that the relatives of large number of the patients now in the State spitals as a public charge have heretofore, though abundantly able and many of them legally evaded the payment of their just obligations to the State. This has not only been a great injustice to the taxpayers of the State, but has unquestionably contributed largely to the placing in the State hospitals of many quiet, harmless patients who might well have been cared for at

Under the central administration of the Lunae laws of the State it obviously will no longer be easy for these relatives of the Insane to escape their just obligations. The policy of the Comdon will be resolutely to insist that all patients having sufficient means shall pay for their own having sufficient means shall pay for their own support; also that relatives of patients who are liable under the statute, and able, shall pay for their support. Care will be taken, however, that only those who are actually able shall be required to pay. From the best reports obtainable, the Commission estimated in its last report to the Legislature that there are about 400 inmates of State hospitals for whose support reimbursement is being made to county officials. This number is is being made to county officials. This number I likely to be doubled through the efforts of the agents of the Commission.

THE POOR CITY CHILDREN ARE GROWING FAT AND BROWN.

A HAPPY HOME IN THE MIDST OF THE BERE-SHIRES-THE GENEROUS PLANS ARRANGED

BY JOHN E. PARSONS-ALL THE VIL-LAGERS TAKE AN INTEREST IN THE YOUNGSTERS.

Curtisville, Mass., Aug. 25 .- "Wal, thet's jest as good a circus as ever I see," remarked a native of Curtisville shortly after the arrival of the first party of children at St. Helen's Home. It was the comment on the introduction of the children to a scene of solid enjoyment such as "The Greatest Show on Earth" could never afford. St. Helen's, located in the midst of the quiet

village, at the junction of two roads, with a beautiful stream flowing between the main and the boys' hall, captures the hearts of the children at first sight. As the carriages roll up to the hospitable doors, cheer after cheer makes the air resound. It is no ordinary cheer that these toys and girls give, but a regular howl of ecstasy. After the baggage is sorted the children are taken to their respective halls, and beds are assigned to The beds are most attractive, and the further discovery that they have springs adds to "Gee, git onto de the joy of the occupants. springs!" is the signal for a general test of the strength of each bed. "Say, mister, kin we go barefeety?" is

ious question of a future President of the United States. Up goes a shout of joy at the answer, and in a twinkling there is a general shedding of The widespread interest taken in the project is footgear, and bare feet are pattering over the floor. The signal is given, and all m stairs. "Move" hardly expresses their manner of contributions, and the rest are making arrangements to respond to the call. So descending. They stampede. A whirlwind would hide itself in disgust in the presence of this rollicking mass. The brook is the point of interest. Big boys, little boys, fat boys, thin boys, boys with freekles and boys with pug boys with freekles and boys with pug noses, all jump, fall and wade into the water. Most of the girls sit on a bench and dangle their feet in the cool stream. Some of the more venturesome, with little screams of alarm, wade post which desires to see the patriotic action of of cash on this account. The larger the sum raised into the deeper parts. At intervals a wild commotion, a splash and a yell tell that some venturesome youth has taken an involuntary bath. The good people of Curtisville enjoy the novel exhibiion, and the interest in the children is so genral that many visitors are received every The children are noted for their fine singing, Tomlinson Hall, Indianapolis, Ind., at 8 o'clock Wednesday morning, September 6, 1893, under the and their exhibition of lung power is quite as replay.
